

## Project Management Essentials

One day of self-paced online study followed by two days in-class:

**November 5-6, 2018**

This course is designed to give new project managers and project team members an overview of the various tools and techniques of project management and the key elements needed to deliver successful projects. This course covers the complete project lifecycle from initiating, through project planning and execution, to project close-out. 21 PDUs.

**New for 2018**

## Introduction to Agile Project Management

**November 7, 2018**

This course aims to introduce participants to the agile way of working using the common Scrum framework. The course expands the framework to include an overview of agile requirements management techniques and agile estimating and planning techniques that are used to set reasonable stakeholder expectations at the start of an agile project. 7 PDUs.

## Business Analysis for the Project Manager

**November 8-9, 2018**

This course is designed to give Project Managers and project practitioners a better understanding of Business Analysis. They will learn how to employ business analysis tools, techniques, and approaches for better project outcomes. 14 PDUs.
